

# **BREAKING GROUND** FOR THE NEW **CEAMSA** INNOVATION CENTER

The leadership position that CEAMSA today has gained in the global Hydrocolloid Business is thanks to a Constant Commitment to Competitiveness, Credibility and Creativity.

In order to secure such continued healthy and growing business, ground was broken on 16/11 2015 for construction of a new phase of the CEAMSA history.

Below image illustrates how the new face of CEAMSA is expected to look like by 2<sup>nd</sup> quarter 2016.

The new Center will consist of a 2 story building with the ground floor allocated application pilot plants for Dairy, Meat, Fruit processing, Confectionery and Bakery applications.

The 1 floor will be new dedicated offices for Export, Marketing and logistic departments as well as for Engineering and Production Management.
